EXPLANATION OF DYNAMIC COMPRESSION

NOTE: Normally we view our organizations from the top down. However, to understand dynamic compression, and how Royalty Commissions are paid on a single order, you need to look at your organization from the bottom up. When Pro tandim and/or TrueScience is purchased commissions are paid by working back toward the top of your organization. Start at the bottom of this page and follow the progression to see how dynamic compression works.

Aaron (Pro 7) 2%
Aaron is a Pro 7 Distributor. Pro 7 and above are eligible to earn a 9th level Royalty Commissions. Level 9 (2%) is paid to Aaron.

James (Dist.) 2%
James is an active Distributor. Distributors are eligible to earn a 1st level Royalty Commission. Level 1 (2%) is paid to James.

Mary 2%
Mary is front line to James and orders Pro tandim and/or TrueScience. LifeVantage will pay 9 levels of Royalty Commissions without breakage. Dynamic compression ensures that all commissions are paid to qualified Distributors. Starting at the bottom, the computer searches upline for the first 9 positions qualified to earn at each pay level. When the computer encounters a position that is not qualified to earn a commission, it skips that position and continues searching upline for a qualified Distributor.
